

When portable precision and versatility matter

Tri Tool's **BOILERMASTER** is a rugged and reliable portable ID mounted end prep machine that performs precision weld prep bevels, facing or counterboring on boiler tubes with an ID over 1.25" and an OD up to 2.63" - up to .531" wall. Depend on a **BOILERMASTER** to help you control costly plant maintenance and downtime (scheduled or otherwise).

BOILERMASTER Features:

- 1 ¼" to 4" pipe range
- Secure Wedge-Lock bit
- Tool steel mandrel
- Mandrel shaft seal
- Ratchet feed system
- 1.5 HP drive motor
- Tapered roller bearings
- Optional 2.63" and 4.00" diameter cutting heads

*Note: The **BOILERMASTER** is a version of our Model 204B Beveler equipped with a ratchet feed mechanism making it ideal for boiler work, and use in narrow and confined spaces.*

Did you know that smaller mandrels can extend the size range of this machine?

1" Reduced Dia. Mandrel (PN 06-0414): 1.0" (25.4mm) to 1.25" (31.8mm) range.

Reduced Dia. Mandrel (PN 06-0413): .610" (15.5mm) to 1.00" (25.4mm) range.

1 ¼" TO 4" Pipe Range
