

Redesigned for our most popular 600 Series
split-frame clamshell lathes

The perfect solution for cutting thin-wall tube & pipe!

New design pad sets cost lower than ever before!

Work with thin-wall tube & pipe faster and easier with our new Full-Support Pad Sets. The redesigned Full-Support Pad Sets ensure secure, distortion-free, mounting support along with maximum precision cutting when performing portable thin-wall tube & pipe OD machining operations.

- Accurate rounding of thin-wall (schedule 5 & 10) tube & pipe for uniform cutting
- Self-centering and self-squaring design makes lathe set-up faster and easier
- Eliminate damage to the tube or pipe OD caused by clamping forces
- A wide selection of pad set sizes for 2.375" through 20" OD tube & pipe
- Can be custom produced for any specific diameter by special order
- Now available from standard inventory for faster delivery
- No unique tools needed for setup or operation
- Compatible with a wide range of TRI TOOL® 600 Series SB, RBL, and RBL Gen2 split-frame clamshell lathes
