

NEW THE TUBE SAW

Cut Pipe and Tube with Greater Precision & Efficiency

THE TUBE SAW from Tri Tool – get lightning-fast cuts with unmatched accuracy from the first tube saw with ambidextrous operation features and the legendary robustness and cut quality from Tri Tool.

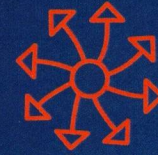

In today's high-pressure industrial landscape, precision tube cutting plays a crucial role in various sectors such as aerospace, mechanical contracting, and pharmaceutical and semiconductor manufacturing. Tri Tool is proud to introduce **THE TUBE SAW**, our innovative new machine that revolutionizes tube and pipe cutting by combining the benefits of heavy-duty construction, lightweight portability and cutting-edge precision.

**Heavy-Duty
& Lightweight**

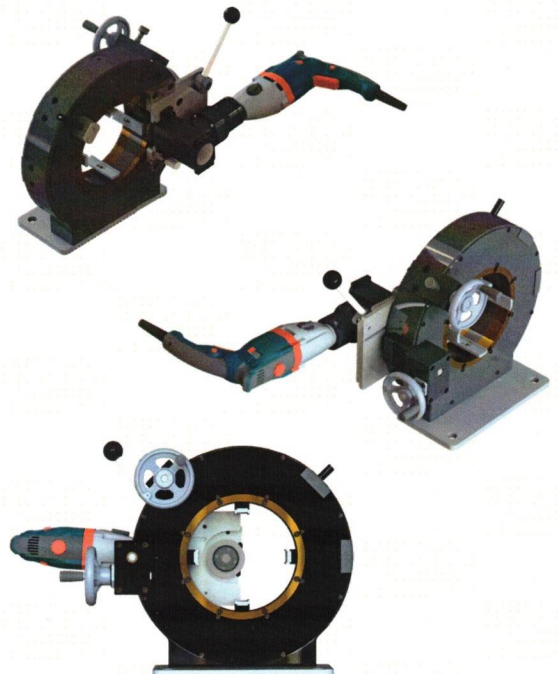

**Speed
& Precision**

**Versatile
Applications**

THE TUBE SAW Technical Features:

- 0.250" - 6.625" OD [6 mm - 168 mm OD] Pipe or Tube
- Up to 0.150" [3.8 mm] wall thickness capability with the standard saw blade.
- Easy-install saw blade system with multiple saw blade types, materials, and designs for every application.
- Ambidextrous operation interfaces allow for the tool to be reconfigured for use on either side of the machine, left handed or right handed.
- Self-centering clamping system provides industry leading precision and square cuts.
- Integrated laser line indicates center of cut on the tube
- Sealed precision bearing ensures smooth accurate sever cuts over years of use.
- Hard anodized coatings throughout the machine components provide corrosion protection and robustness for the harshest environments.

THE TUBE SAW puts the power of the heavy-duty yet lightweight to work for you and elevates your tube cutting capabilities.

Call +1-916-288-6100 or email sales@tritool.com now to secure **THE TUBE SAW** and unlock a new era of precision and efficiency.
